

manufacturers to provide suggestions for determining the price of their equipment. EPA proposes to give vehicle manufacturers a one-year lead time to prepare for aftermarket sales of enhanced equipment.

EPA expects that dealerships will provide effective and timely reprogramming services to independent technicians who elect not to purchase vehicle manufacturer enhanced diagnostic equipment.

EPA also proposes that vehicle manufacturers should have the option of providing service, repair and diagnostic information through an EDI or similar system.

II. Issues

EPA believes that given the issues discussed above, the following subject areas are likely to be discussed at the workshop:

- Factors to be considered in using NTIS as a clearinghouse for service information.
- The extent to which vehicle manufacturers should receive royalties from the NTIS (to ensure that the cost of information remains reasonable and, therefore, available but to avoid unreasonable interference with manufacturers' copyright protection).
- Descriptions and definitions of terms.
- Exactly what information is proprietary and reasons why such information should or should not be considered proprietary.
- Adoption of J2008.
- Providing deeply tagged information to the aftermarket.
- Availability of vehicle manufacturers' enhanced diagnostic equipment.
- Other issues that EPA may identify.

III. Format of Workshop

The workshop will be conducted informally. EPA will make a presentation highlighting the information availability provisions in the September 1991 NPRM. After EPA's presentation, attendees will be encouraged to make oral presentations and participate in a discussion of issues in the order that they are presented in this workshop notice. A court reporter will be present to make a written transcript of the proceedings. A copy of the transcript and all documents received at the workshop will be placed in the docket. The docket in this proceeding shall be reopened for thirty days following the workshop for comments pertaining to issues discussed at the workshop.

Dated: June 17, 1993.

Michael H. Shapiro,
Acting Assistant Administrator for Air and Radiation.

BILLING CODE 6560-50-P

40 CFR Part 300

[FRL-4668-4]

National Priorities List for Uncontrolled Hazardous Waste Sites, Proposed Rule No. 15

AGENCY: Environmental Protection Agency.

ACTION: Proposed rule.

SUMMARY: The Comprehensive Environmental Response, Compensation, and Liability Act of 1980 ("CERCLA" or "the Act"), as amended, requires that the National Oil and Hazardous Substances Pollution Contingency Plan ("NCP") include a list of national priorities among the known releases or threatened releases of hazardous substances, pollutants, or contaminants throughout the United States. The National Priorities List ("NPL") constitutes this list.

The Environmental Protection Agency ("EPA") proposes to add new sites to the NPL. This 15th proposed revision to the NPL includes 7 sites in the General Superfund section and 10 in the Federal Facilities section. The identification of a site for the NPL is intended primarily to guide EPA in determining which sites warrant further investigation to assess the nature and extent of public health and environmental risks associated with the site and to determine what CERCLA-financed remedial action(s), if any, may be appropriate. This action does not affect the 1,199 sites currently listed on the NPL (1,076 in the General Superfund Section and 123 in the Federal Facilities Section). However, it does increase the number of proposed sites to 71 (51 in the General Superfund Section and 20 in the Federal Facilities Section). Final and proposed sites now total 1,270.

DATES: Comments must be submitted on or before July 23, 1993, for South Weymouth Naval Air Station (Weymouth, Massachusetts), Materials Technology Laboratory (U.S. Army, Watertown, Massachusetts), and Portsmouth Naval Shipyard (Kittery, Maine). For the remaining sites in this proposal, comments must be submitted on or before August 23, 1993.

ADDRESSES: Mail original and three copies of comments (no facsimiles) to Docket Coordinator, Headquarters; U.S.

EPA CERCLA Docket Office; OS-245; Waterside Mall; 401 M Street, SW., Washington, DC 20460; 202/260-3046. For additional Docket addresses and further details on their contents, see Section I of the "Supplementary Information" portion of this preamble.

FOR FURTHER INFORMATION CONTACT:

Terry Keidan, Hazardous Site Evaluation Division, Office of Emergency and Remedial Response (OS-5204G), U.S. Environmental Protection Agency, 401 M Street, SW. Washington, DC, 20460, or the Superfund Hotline, Phone (800) 424-9346 or (703) 920-9810 in the Washington, DC, metropolitan area.

SUPPLEMENTARY INFORMATION:

- I. Introduction
- II. Purpose and Implementation of the NPL
- III. Contents of This Proposed Rule
- IV. Regulatory Impact Analysis
- V. Regulatory Flexibility Act Analysis

I. Introduction

Background

In 1980, Congress enacted the Comprehensive Environmental Response, Compensation, and Liability Act, 42 U.S.C. 9601-9675 ("CERCLA" or "the Act") in response to the dangers of uncontrolled hazardous waste sites. CERCLA was amended on October 17, 1986, by the Superfund Amendments and Reauthorization Act ("SARA"), Public Law No. 99-499, 100 Stat. 1613 *et seq.* To implement CERCLA, the Environmental Protection Agency ("EPA" or "the Agency") promulgated the revised National Oil and Hazardous Substances Pollution Contingency Plan ("NCP"), 40 CFR part 300, on July 16, 1982 (47 FR 31180), pursuant to CERCLA section 105 and Executive Order 12316 (46 FR 42237, August 20, 1981). The NCP sets forth the guidelines and procedures needed to respond under CERCLA to releases and threatened releases of hazardous substances, pollutants, or contaminants. EPA has revised the NCP on several occasions, most recently on March 8, 1990 (55 FR 8666).

Section 105(a)(8)(A) of CERCLA requires that the NCP include "criteria for determining priorities among releases or threatened releases throughout the United States for the purpose of taking remedial action." As defined in CERCLA section 101(24), remedial action tends to be long-term in nature and involves response actions that are consistent with a permanent remedy for a release.

Mechanisms for determining priorities for possible remedial actions financed by the Trust Fund established under CERCLA (commonly referred to

0

C

C

as the "Superfund") and financed by other persons are included in the NCP at 40 CFR 300.425(c) (55 FR 8845, March 8, 1990). Under 40 CFR 300.425(c)(1), a site may be included on the NPL if it scores sufficiently high on the Hazard Ranking System ("HRS"), which is appendix A of 40 CFR part 300. On December 14, 1990 (55 FR 51532), EPA promulgated revisions to the HRS partly in response to CERCLA section 105(c), added by SARA. The revised HRS evaluates four pathways: Ground water, surface water, soil exposure, and air. The HRS serves as a screening device to evaluate the relative potential of uncontrolled hazardous substances, pollutants, and contaminants to pose a threat to human health or the environment. Those sites that score 28.50 or greater on the HRS are eligible for the NPL.

Under a second mechanism for adding sites to the NPL, each State may designate a single site as its top priority, regardless of the HRS score. This mechanism, provided by the NCP at 40 CFR 300.425(c)(2), requires that, to the extent practicable, the NPL include within the 100 highest priorities, one facility designated by each State representing the greatest danger to public health, welfare, or the environment among known facilities in the State.

The third mechanism for listing, included in the NCP at 40 CFR 300.425(c)(3), allows certain sites to be listed whether or not they score above 28.50, if all of the following conditions are met:

- The Agency for Toxic Substances and Disease Registry (ATSDR) of the U.S. Public Health Service has issued a health advisory that recommends dissociation of individuals from the release.

- EPA determines that the release poses a significant threat to public health.

- EPA anticipates that it will be more cost-effective to use its remedial authority than to use its removal authority to respond to the release.

Based on these criteria, and pursuant to section 105(a)(8)(B) of CERCLA, as amended by SARA, EPA promulgates a list of national priorities among the known or threatened releases of hazardous substances, pollutants, or contaminants throughout the United States. That list, which is appendix B of 40 CFR part 300, is the National Priorities List ("NPL"). CERCLA section 105(a)(8)(B) defines the NPL as a list of "releases" and as a list of the highest priority "facilities." The discussion below may refer to the "releases or threatened releases" that are included

on the NPL interchangeably as "releases," "facilities," or "sites." CERCLA section 105(a)(8)(B) also requires that the NPL be revised at least annually. A site may undergo CERCLA-financed remedial action only after it is placed on the NPL, as provided in the NCP at 40 CFR 300.425(b)(1).

EPA promulgated an original NPL of 406 sites on September 8, 1983 (48 FR 40658). The NPL has been expanded since then, most recently on October 14, 1992 (57 FR 47180).

The NPL includes two sections, one of sites being evaluated and cleaned up by EPA (the "General Superfund Section"), and one of sites being addressed by other Federal agencies (the "Federal Facilities Section"). Under Executive Order 12580 and CERCLA section 120, each Federal agency is responsible for carrying out most response actions at facilities under its own jurisdiction, custody, or control, although EPA is responsible for preparing an HRS score and determining if the facility is placed on the NPL. EPA is not the lead agency at these sites, and its role at such sites is accordingly less extensive than at other sites. The Federal Facilities Section includes those facilities at which EPA is not the lead agency.

Deletions/Cleanups

EPA may delete sites from the NPL where no further response is appropriate under Superfund, as explained in the NCP at 40 CFR 300.425(e) (55 FR 8845, March 8, 1990). To date, the Agency has deleted 50 sites from the General Superfund Section of the NPL, most recently the Woodbury Chemical Co., Commerce City, Colorado (58 FR 15287, March 22, 1993).

EPA also has developed an NPL construction completion list ("CCL") to simplify its system of categorizing sites and to better communicate the successful completion of cleanup activities (58 FR 12142, March 2, 1993). Sites qualify for the CCL when:

- (1) Any necessary physical construction is complete, whether or not final cleanup levels or other requirements have been achieved;
- (2) EPA has determined that the response action should be limited to measures that do not involve construction (e.g., institutional controls); or
- (3) The site qualifies for deletion from the NPL. Inclusion of a site on the CCL has no legal significance.

In addition to the 50 sites that have been deleted from the NPL because they have been cleaned up (the Waste Research and Reclamation site was deleted based on deferral to another program and is not considered cleaned

up), an additional 112 sites are also in the NPL CCL, all but one from the General Superfund Section. Thus, as of April 1992, the CCL consists of 163 sites.

Cleanups at sites on the NPL do not reflect the total picture of Superfund accomplishments. As of March 30, 1993, EPA had conducted 568 removal actions at NPL sites, and 1,921 removal actions at non-NPL sites. Information on removals is available from the Superfund hotline.

Pursuant to the NCP at 40 CFR 300.425(c), this document proposes to add 17 sites to the NPL. The General Superfund Section includes 1,076 sites, and the Federal Facilities Section includes 123 sites, for a total of 1,199 sites on the NPL. Final and proposed sites now total 1,270. These numbers reflect EPA's decision to remove the Hevi-Duty Electric Co., in Goldsboro, North Carolina, and the Court's removal of the Tex-Tin Corp. site, in Texas City, Texas, from the NPL.

Public Comment Period

The documents that form the basis for EPA's evaluation and scoring of sites in this rule are contained in dockets located both at EPA Headquarters and in the appropriate Regional offices. The dockets are available for viewing, by appointment only, after the appearance of this rule. The hours of operation for the Headquarters docket are from 9 a.m. to 4 p.m., Monday through Friday excluding Federal holidays. Please contact individual Regional dockets for hours. Note that the Headquarters docket, although it will be moving during the comment period, will remain open for viewing of sites included in this rule.

The Headquarters docket for this rule contains HRS score sheets for each proposed site; a Documentation Record for each site describing the information used to compute the score; pertinent information for any site affected by particular statutory requirements or EPA listing policies; and a list of documents referenced in the Documentation Record. Each Regional docket for this rule contains all of the information in the Headquarters docket for sites in that Region, plus the actual reference documents containing the data principally relied upon and cited by EPA in calculating or evaluating the HRS scores for sites in that Region. These reference documents are available only in the Regional dockets. Interested parties may view documents, by appointment only, in the Headquarters or the appropriate Regional docket or copies may be requested from the Headquarters or appropriate Regional docket. An informal written request, rather than a formal request under the Freedom of Information Act, should be the ordinary procedure for obtaining copies of any of these documents.

EPA considers all comments received during the comment period. During the comment period, comments are placed in the Headquarters docket and are available to the public on an "as received" basis. A complete set of comments will be available for viewing in the Regional docket approximately one week after the formal comment period closes. Comments received after the comment period closes will be available in the Headquarters docket and in the Regional docket on an "as received" basis.

Comments that include complex or voluminous reports, or materials prepared for purposes other than HRS scoring, should point out the specific information that EPA should consider and how it affects individual HRS factor values. See *Northside Sanitary Landfill v. Thomas*, 849 F.2d 1516 (D.C. Cir. 1988). EPA will make final listing decision after considering the relevant

comments received during the comment period.

In past rules, EPA has attempted to respond to late comments, or when that was not practicable, to read all late comments and address those that brought to the Agency's attention a fundamental error in the scoring of a site. (See, most recently, 57 FR 4824 (February 7, 1992).) Although EPA intends to pursue the same policy with sites in this rule, EPA can guarantee that it will consider only those comments postmarked by the close of the formal comment period. EPA cannot delay a final listing decision solely to accommodate consideration of late comments.

II. Purpose and Implementation of the NPL

Purpose

The legislative history of CERCLA (Report of the Committee on Environment and Public Works, Senate Report No. 96-848, 96th Cong., 2d Sess. 60 (1980)) states the primary purpose of the NPL:

The priority lists serve primarily informational purposes, identifying for the States and the public those facilities and sites or other releases which appear to warrant remedial actions. Inclusion of a facility or site on the list does not in itself reflect a judgment of the activities of its owner or operator, it does not require those persons to undertake any action, nor does it assign liability to any person. Subsequent government action in the form of remedial actions or enforcement actions will be necessary in order to do so, and these actions will be attended by all appropriate procedural safeguards.

The purpose of the NPL, therefore, is primarily to serve as an informational and management tool. The identification of a site for the NPL is intended primarily to guide EPA in determining which sites warrant further investigation to assess the nature and extent of the public health and environmental risks associated with the site and to determine what CERCLA remedial action(s), if any, may be appropriate. The NPL also serves to notify the public of sites that EPA believes warrant further investigation. Finally, listing a site may, to the extent potentially responsible parties are identifiable at the time of listing, serve as notice to such parties that the Agency may initiate CERCLA-financed remedial action.

Implementation

After initial discovery of a site at which a release or threatened release may exist, EPA begins a series of increasingly complex evaluations. The

first step, the Preliminary Assessment ("PA"), is a low-cost review of existing information to determine if the site poses a threat to public health or the environment. If the site presents a serious imminent threat, EPA may take immediate removal action. If the PA shows that the site presents a threat but not an imminent threat, EPA will generally perform a more extensive study called the Site Inspection ("SI"). The SI involves collecting additional information to better understand the extent of the problem at the site, screen out sites that will not qualify for the NPL, and obtain data necessary to calculate an HRS score for sites which warrant placement on the NPL and further study. EPA may perform removal actions at any time during the process. To date EPA has completed approximately 34,000 PAs and approximately 17,000 SIs.

The NCP at 40 CFR 300.425(b)(1) (55 FR 8845, March 8, 1990) limits expenditure of the Trust Fund for remedial actions to sites on the NPL. However, EPA may take enforcement actions under CERCLA or other applicable statutes against responsible parties regardless of whether the site is on the NPL, although, as a practical matter, the focus of EPA's CERCLA enforcement actions has been and will continue to be on NPL sites. Similarly, in the case of CERCLA removal actions, EPA has the authority to act at any site, whether listed or not, that meets the criteria of the NCP at 40 CFR 300.415(b)(2) (55 FR 8842, March 8, 1990). EPA's policy is to pursue cleanup of NPL sites using all the appropriate response and/or enforcement actions available to the Agency, including authorities other than CERCLA. The Agency will decide on a site-by-site basis whether to take enforcement or other action under CERCLA or other authorities prior to undertaking response action, proceed directly with Trust Fund-financed response actions and seek to recover response costs after cleanup, or do both. To the extent feasible, once sites are on the NPL, EPA will determine high-priority candidates for CERCLA-financed response action and/or enforcement action through both State and Federal initiatives. EPA will take into account which approach is more likely to accomplish cleanup of the site most expeditiously while using CERCLA's limited resources as efficiently as possible.

Although the ranking of sites by HRS scores is considered, it does not, by itself, determine the sequence in which EPA funds remedial response actions, since the information collected to develop HRS scores is not sufficient to

determine either the extent of contamination or the appropriate response for a particular site (40 CFR 300.425(b)(2), 55 FR 8845, March 8, 1990). Additionally, resource constraints may preclude EPA from evaluating all HRS pathways; only those presenting significant risk or sufficient to make a site eligible for the NPL may be evaluated. Moreover, the sites with the highest scores do not necessarily come to the Agency's attention first, so that addressing sites strictly on the basis of ranking would in some cases require stopping work at sites where it was already underway.

More detailed studies of a site are undertaken in the Remedial Investigation/Feasibility Study ("RI/FS") that typically follows listing. The purpose of the RI/FS is to assess site conditions and evaluate alternatives to the extent necessary to select a remedy (40 CFR 300.430(a)(2) (55 FR 8846, March 8, 1990)). It takes into account the amount of contaminants released into the environment, the risk to affected populations and environment, the cost to remediate contamination at the site, and the response actions that have been taken by potentially responsible parties or others. Decisions on the type and extent of response action to be taken at these sites are made in accordance with 40 CFR 300.415 (55 FR 8842, March 8, 1990) and 40 CFR 300.430 (55 FR 8846, March 8, 1990). After conducting these additional studies, EPA may conclude that initiating a CERCLA remedial action using the Trust Fund at some sites on the NPL is not appropriate because of more pressing needs at other sites, or because a private party cleanup is already underway pursuant to an enforcement action. Given the limited resources available in the Trust Fund, the Agency must carefully balance the relative needs for response at the numerous sites it has studied. It is also possible that EPA will conclude after further analysis that the site does not warrant remedial action.

RI/FS at Proposed Sites

An RI/FS may be performed at sites proposed in the *Federal Register* for placement on the NPL (or even sites that have not been proposed for placement on the NPL) pursuant to the Agency's removal authority under CERCLA, as outlined in the NCP at 40 CFR 300.415. Although an RI/FS generally is conducted at a site after it has been placed on the NPL, in a number of circumstances the Agency elects to conduct an RI/FS at a site proposed for placement on the NPL in preparation for a possible Trust Fund-financed remedial

action, such as when the Agency believes that a delay may create unnecessary risks to public health or the environment. In addition, the Agency may conduct an RI/FS to assist in determining whether to conduct a removal or enforcement action at a site.

Facility (Site) Boundaries. The purpose of the NPL is merely to identify releases or threatened releases of hazardous substances that are priorities for further evaluation. The Agency believes that it would be neither feasible nor consistent with this limited purpose for the NPL to attempt to describe releases in precise geographical terms. The term "facility" is broadly defined in CERCLA to include any area where a hazardous substance has "come to be located" (CERCLA section 101(9)), and the listing process is not intended to define or reflect boundaries of such facilities or releases. Site names are provided for general identification purposes only. Knowledge of the geographic extent of sites will be refined as more information is developed during the RI/FS and even during implementation of the remedy.

Because the NPL does not assign liability or define the geographic extent of a release, a listing need not be amended if further research into the contamination at a site reveals new information as to its extent. This is further explained in preambles to past NPL rules, most recently February 11, 1991 (56 FR 5598).

Limitations on Payment of Claims for Response Actions

Sections 111(a)(2) and 122(b)(1) of CERCLA authorize the Fund to reimburse certain parties for necessary costs of performing a response action. As is described in more detail at 58 FR 5460 (January 21, 1993), 40 CFR part 307, there are two major limitations placed on the payment of claims for response actions. First, only private parties, certain potentially responsible parties (including States and political subdivisions), and certain foreign entities are eligible to file such claims. Second, all response actions under sections 111(a)(2) and 122(b)(1) must receive prior approval, or "preauthorization," from EPA.

III. Contents of This Proposed Rule

Table 1 identifies the 7 NPL sites in the General Superfund Section and table 2 identifies the 10 NPL sites in the Federal Facilities Section being proposed in this rule. Both tables follow this preamble. All these sites are proposed based on HRS scores of 28.50 or above. The sites in table 1 are listed alphabetically by State, for ease of

identification, with group number identified to provide an indication of relative ranking. To determine group number, sites on the NPL are placed in groups of 50; for example, a site in Group 4 of this proposal has a score that falls within the range of scores covered by the fourth group of 50 sites on the General Superfund Section of the NPL. Sites in the Federal Facilities Section are also presented by group number based on groups of 50 sites in the General Superfund Section.

Statutory Requirements

CERCLA section 105(a)(8)(B) directs EPA to list priority sites "among" the known releases or threatened releases of hazardous substances, pollutants, or contaminants, and section 105(a)(8)(A) directs EPA to consider certain enumerated and "other appropriate" factors in doing so. Thus, as a matter of policy, EPA has the discretion not to use CERCLA to respond to certain types of releases. Where other authorities exist, placing sites on the NPL for possible remedial action under CERCLA may not be appropriate. Therefore, EPA has chosen not to place certain types of sites on the NPL even though CERCLA does not exclude such action. If, however, the Agency later determines that sites not listed as a matter of policy are not being properly responded to, the Agency may place them on the NPL.

The listing policies and statutory requirements of relevance to this proposed rule cover sites subject to the Resource Conservation and Recovery Act ("RCRA") (42 U.S.C. 6901-6991i) and Federal facility sites. These policies and requirements are explained below and have been explained in greater detail in previous rulemakings (56 FR 5598, February 11, 1991).

Releases From Resource Conservation and Recovery Act (RCRA) Sites

EPA's policy is that non-Federal sites subject to RCRA Subtitle C corrective action authorities will not, in general, be placed on the NPL. However, EPA will list certain categories of RCRA sites subject to Subtitle C corrective action authorities, as well as other sites subject to those authorities, if the Agency concludes that doing so best furthers the aims of the NPL/RCRA policy and the CERCLA program. EPA has explained these policies in detail in the past (51 FR 21054, June 10, 1986; 53 FR 23978, June 24, 1988; 54 FR 41000, October 4, 1989; 56 FR 5602, February 11, 1991).

Consistent with EPA's NPL/RCRA policy, EPA is proposing to add one site to the General Superfund Section of the NPL that may be subject to RCRA Subtitle C corrective action authorities.

the Alcoa (Point Comfort)/Lavaca Bay site in Point, Comfort, Texas. Material has been placed in the public docket establishing that portions of the site formerly were operated as an "interim status" facility under RCRA (referred to in the NPL/RCRA deferral policy as "converters"), and that the full extent of EPA's authority to address off-site contamination under RCRA is untested. Listing of the Lavaca Bay site on the NPL under these circumstances is consistent with EPA's NPL/RCRA deferral policy.

Releases From Federal Facility Sites

On March 13, 1989 (54 FR 10520), the Agency announced a policy for placing Federal facility sites on the NPL if they meet the eligibility criteria (e.g., an HRS score of 28.50 or greater), even if the Federal facility also is subject to the corrective action authorities of RCRA Subtitle C. In that way, those sites could be cleaned up under CERCLA, if appropriate.

This rule proposes to add ten sites to the Federal Facilities Section of the NPL.

IV. Regulatory Impact Analysis

The costs of cleanup actions that may be taken at sites are not directly attributable to placement on the NPL, as explained below. Therefore, the Agency has determined that this rulemaking is not a "major" regulation under Executive Order 12291. EPA has conducted a preliminary analysis of the economic implications of today's proposal to add new sites to the NPL. EPA believes that the kinds of economic effects associated with this proposed revision to the NPL are generally similar to those identified in the regulatory impact analysis ("RIA") prepared in 1982 for revisions to the NCP pursuant to section 105 of CERCLA (47 FR 31180, July 16, 1982) and the economic analysis prepared when amendments to the NCP were proposed (50 FR 5882, February 12, 1985). This rule was submitted to the Office of Management and Budget for review as required by Executive Order 12291.

Costs

This proposed rulemaking is not a "major" regulation because it does not establish that EPA necessarily will undertake remedial action, nor does it require any action by a private party or determine any party's liability for site response costs. Costs that arise out of responses at sites in the General Superfund Section result from site-by-site decisions about what actions to

take, not directly from the act of listing itself. Nonetheless, it is useful to consider the costs that may be associated with responding to all sites in this rule. The proposed listing of a site on the NPL may be followed by a search for potentially responsible parties and an RI/FS to determine if remedial actions will be undertaken at a site. Selection of a remedial alternative, and design and construction of that alternative, may follow completion of the RI/FS, and operation and maintenance ("O&M") activities may continue after construction has been completed.

EPA initially bears costs associated with responsible party searches. Responsible parties may enter into consent orders or agreements to conduct or pay the costs of the RI/FS, remedial design and remedial action, and O&M, or EPA and the States may share costs up front and subsequently bring an action for cost recovery.

The State's share of site cleanup costs for Trust Fund-financed actions is governed by CERCLA section 104(c). For nonpublicly-operated sites, EPA will pay from the Trust Fund for 100% of the costs of the RI/FS and remedial planning, and 90% of the costs of the remedial action, leaving 10% to the State. For sites operated by a State or political subdivision, the State's share is at least 50% of all response costs at the site, including the cost associated with the RI/FS, remedial design, and construction and implementation of the remedial action selected. After construction of the remedy is complete, costs fall into two categories:

- For restoration of ground water and surface water, EPA will pay from the Trust Fund a share of the start-up costs according to the cost-allocation criteria in the previous paragraph for 10 years or until a sufficient level of protectiveness is achieved before the end of 10 years. 40 CFR 300.435(f)(3). After that, the State assumes all O&M costs. 40 CFR 300.435(f)(1).

- For other cleanups, EPA will pay from the Trust Fund a share of the costs of a remedy according to the cost-allocation criteria in the previous paragraph until it is operational and functional, which generally occurs after one year. 40 CFR 300.435(f)(2), 300.510(c)(2). After that, the State assumes all O&M costs. 40 CFR 300.510(c)(1).

In previous NPL rulemakings, the Agency estimated the costs associated with these activities (RI/FS, remedial design, remedial action, and O&M) on an average-per-site and total cost basis. EPA will continue with this approach, using the most recent (1988) cost estimates available; these estimates are presented below. However, costs for individual sites vary widely, depending

on the amount, type, and extent of contamination. Additionally, EPA is unable to predict what portions of the total costs responsible parties will bear, since the distribution of costs depends on the extent of voluntary and negotiated response and the success of any cost-recovery actions.

| Cost category | Average total cost per site ¹ |
|-----------------------------------------|------------------------------------------|
| RI/FS | 1,300,000 |
| Remedial Design | 1,500,000 |
| Remedial Action | ² 25,000,000 |
| Net present value of O&M ² . | 3,770,000 |

¹ 1988 U.S. Dollars

² Assumes cost of O&M over 30 years, \$400,000 for the first year and 10% discount rate

³ Includes State cost-share

Source: Office of Program Management, Office of Emergency and Remedial Response, U.S. EPA, Washington, DC.

Possible costs to States associated with today's proposed rule for Trust Fund-financed response action arise from the required State cost-share of:

(1) For privately owned sites at which remedial action involving treatment to restore ground and surface water quality are undertaken, 10% of the cost of constructing the remedy, and 10% of the cost of operating the remedy for a period up to 10 years after the remedy becomes operational and functional;

(2) For privately-owned sites at which other remedial actions are undertaken, 10% of the cost of all remedial action, and 10% of costs incurred within one year after remedial action is complete to ensure that the remedy is operational and functional; and

(3) For sites publicly-operated by a State or political subdivision at which response actions are undertaken, at least 50% of the cost of all response actions. States must assume the cost for O&M after EPA's participation ends. Using the assumptions developed in the 1982 RIA for the NCP, EPA has assumed that 90% of the non-Federal sites proposed for the NPL in this rule will be privately-operated and 10% will be State- or locally-operated. Therefore, using the budget projections presented above, the cost to States of undertaking Federal remedial planning and actions at all non-Federal sites in today's proposed rule, but excluding O&M costs, would be approximately \$28 million. State O&M costs cannot be accurately determined because EPA, as noted above, will share costs for up to 10 years for restoration of ground water and surface water, and it is not known how many sites will require this treatment and for how long. However, based on

past experience, EPA believes a reasonable estimate is that it will share start-up costs for up to 10 years at 25% of sites. Using this estimate, State O&M costs would be approximately \$25 million. As with the EPA share of costs, portions of the State share will be borne by responsible parties.

Placing a site on the NPL does not itself cause firms responsible for the site to bear costs. Nonetheless, a listing may induce firms to clean up the sites voluntarily, or it may act as a potential trigger for subsequent enforcement or cost-recovery actions. Such actions may impose costs on firms, but the decisions to take such actions are discretionary and made on a case-by-case basis. Consequently, these effects cannot be precisely estimated. EPA does not believe that every site will be cleaned up by a responsible party. EPA cannot project at this time which firms or industry sectors will bear specific portions of the response costs, but the Agency considers: the volume and nature of the waste at the sites; the strength of the evidence linking the wastes at the site to the parties; the parties' ability to pay; and other factors when deciding whether and how to proceed against the parties.

Economy-wide effects of this proposed amendment to the NCP are aggregations of effects on firms and State and local governments. Although effects could be felt by some individual firms and States, the total impact of this proposal on output, prices, and employment is expected to be negligible at the National level, as was the case in the 1982 RIA.

Benefits

The real benefits associated with today's proposal to place additional sites on the NPL are increased health and environmental protection as a result of increased public awareness of potential hazards. In addition to the potential for more federally-financed remedial actions, expansion of the NPL could accelerate privately-financed, voluntary cleanup efforts. Proposing sites as national priority targets also may give States increased support for funding responses at particular sites.

As a result of the additional CERCLA remedies, there will be lower human exposure to high-risk chemicals, and higher-quality surface water, ground water, soil, and air. These benefits are expected to be significant, although difficult to estimate before the RI/FS is completed at these sites.

V. Regulatory Flexibility Act Analysis

The Regulatory Flexibility Act of 1980 requires EPA to review the impacts of this action on small entities, or certify that the action will not have a significant impact on a substantial number of small entities. By small entities, the Act refers to small businesses, small government jurisdictions, and nonprofit organizations.

While this rule proposes to revise the NCP, it is not a typical regulatory change since it does not automatically impose costs. As stated above, proposing sites to the NPL does not in itself require any action by any party, nor does it determine the liability of any party for the cost of cleanup at the site.

Further, no identifiable groups are affected as a whole. As a consequence, impacts on any group are hard to predict. A site's proposed inclusion on the NPL could increase the likelihood of adverse impacts on responsible parties (in the form of cleanup costs), but at this time EPA cannot identify the potentially affected businesses or estimate the number of small businesses that might also be affected.

The Agency does expect that placing the sites in this proposed rule on the NPL could significantly affect certain industries, or firms within industries, that have caused a proportionately high percentage of waste site problems. However, EPA does not expect the listing of these sites to have a significant economic impact on a substantial number of small businesses.

In any case, economic impacts would occur only through enforcement and cost-recovery actions, which EPA takes at its discretion on a site-by-site basis. EPA considers many factors when determining enforcement actions, including not only the firm's contribution to the problem, but also its ability to pay.

The impacts (from cost recovery) on small governments and nonprofit organizations would be determined on a similar case-by-case basis.

For the foregoing reasons, I hereby certify that this proposed rule would not have a significant economic impact on a substantial number of small entities. Therefore, this proposed regulation does not require a regulatory flexibility analysis.

BILLING CODE 6560-50-F

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Public Health Service

42 CFR Part 59

Standards of Compliance for Abortion-Related Services in Family Planning Service Projects

AGENCY: Public Health Service, DHHS.

ACTION: Proposed rule; reopening of public comment period.

SUMMARY: The Public Health Service is reopening for 45 days the public comment period on the rules proposed to establish compliance standards for abortion-related services provided by family planning projects funded under title X of the Public Health Service Act. The proposed rules were published in the Federal Register on February 5, 1993. DHHS is taking this action in response to requests from the public for further information on prior policies and to obtain more helpful public comment on the proposed rules. DHHS will make a statement of the prior policies available as set forth below.

DATES: Written comments must be received on or before August 9, 1993.

ADDRESSES: Written comments: Submit written comments to Mr. Gerald Bennett, Acting Deputy Assistant Secretary for Population Affairs, DHHS, P.O. Box 23783, Washington, DC 20036-3783.

Policy statement: A statement of the policies will be available for inspection and copying at the following regional and central office locations which appear in the Supplementary Information section.

Written comments will be available for public inspection during normal business hours at 200 Independence Ave., SW., room 736E, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Mr. Gerald Bennett, 202-690-8335.

SUPPLEMENTARY INFORMATION: On February 5, 1993, the Department of Health and Human Services published in the Federal Register, at 58 FR 7464, a notice of proposed rulemaking which proposed revised standards of compliance to replace the so-called "Gag Rule" issued on February 2, 1988, at 53 FR 2922. The proposed rule would re-establish for family planning projects funded under title X of the Public Health Service Act, 42 U.S.C. 300 *et seq.*, the standards for compliance with section 1008 of that Act, 42 U.S.C. 300a-6, that applied prior to February 2, 1988. Also published on February 5 was an interim rule which, in part, made applicable to title X projects the pre-1988 policies during the pendency of the rulemaking. As explained in the notice of proposed rulemaking, those policies derive from previous guidelines and opinions of the Department concerning section 1008.

A statement of the policies will be available for inspection and copying at the following regional and central office locations:

Regional Offices

DHHS/PHS Region I (CT, ME, MA, NH, RI, VT), JFK Federal Bldg. Rm. 1826, Government Center, Boston, MA 02203
DHHS Region II (NJ, NY, PR, VI), 26 Federal Plaza, Rm. 3337, New York, NY 10278

DHHS Region III (DE, D.C., MD, PA, VA, WV), 3535 Market St., Rm. 10200, Philadelphia, PA 19104

DHHS Region IV (KY, MS, TN, AL, FL, GA, SC), 101 Marietta Tower, Suite 1106, Atlanta, GA 30323

DHHS Region V (IL, IN, MI, MN, OH, WI), 105 West Adams, 17th Floor, Chicago, IL 60603

DHHS Region VI (AR, LA, NM, OK, TX), 1200 Main Tower Bldg., Rm. 1800, Dallas, TX 75202

DHHS Region VII (IA, KS, MO, NE), Federal Office Building, 601 East 12th Street, Rm. 501, Kansas City, MO 64106

DHHS Region VIII (CO, MT, ND, SD, UT, WY), Federal Building, 1961 Stout Street, Room 498, Denver, CO 80294

DHHS Region IX (AZ, CA, HI, NV, GU, AS, Trust Territories), 50 United Nations Plaza, Rm. 327, San Francisco, CA 94102

DHHS Region X (AK, ID, OR, WA), Blanchard Plaza, 2201 Sixth Avenue, Rm. 710A, Seattle, WA 98121-2500

Washington, DC

Office of Population Affairs, 200 Independence Ave., SW., Room 736E, Washington, DC 20201

The policy statement will be available for public inspection and copying during normal business hours at the above addresses.

The comment period on the proposed rules closed on April 6, 1993. During the comment period, the Department received several requests for further information on the specific details of the pre-1988 policies. The Department agrees that provision of the information requested would promote more informed and helpful public comment on the proposed rules. Accordingly, in order to provide the policies in a convenient and complete manner and to facilitate a more informed public comment on the issues, the Department is making available a statement of those policies for public inspection and copying at the above addresses and reopening the public comment period for an additional 45 days.

[FRL-4664-2]

Public Water Supply Supervision Program; Program Revision for the State of Idaho**AGENCY:** Environmental Protection Agency.**ACTION:** Notice.

SUMMARY: Notice is hereby given that the State of Idaho is revising its approved State Public Water Supply Supervision Primacy Program. Idaho has adopted drinking water regulations for public notification, total coliforms, the treatment of surface water, lead and copper, and certain volatile organic chemicals, synthetic organic chemicals and inorganic chemicals. EPA has determined that these State program revisions are no less stringent than the corresponding federal regulations. Therefore, EPA has tentatively decided to approve these State program revisions.

All interested parties may request a public hearing. A request for a public hearing must be submitted July 23, 1993, to the Regional Administrator at the EPA address shown below. Frivolous or insubstantial requests for a hearing may be denied by the Regional Administrator. However, if a substantial request for a public hearing is made by July 23, 1993. A public hearing will be held. If no timely and appropriate request for a hearing is received and the Regional Administrator does not elect to hold a hearing on his own motion, this determination shall become effective July 23, 1993.

Any request for a public hearing shall include the following:

- (1) The name, address, and telephone number of the individual, organization, or other entity requesting a hearing;
- (2) A brief statement of the requesting person's interest in the Regional Administrator's determination and of information that the requesting person intends to submit at such hearing; and
- (3) The signature of the individual making the request; or, if the request is made on behalf of an organization or other entity, the signature of a responsible official of the organization or other entity.

ADDRESSES: All documents relating to this determination are available for inspection between the hours of 8 a.m. and 4:30 p.m., Monday through Friday, at the following offices: Idaho Department of Health & Welfare, Division of Environmental Quality, 1410 North Hilton Street, Boise, Idaho 83706; and Environmental Protection Agency, Region 10 Library, 1200 Sixth Avenue, Seattle, Washington 98101.

FOR FURTHER INFORMATION CONTACT:

Wendy Marshall, EPA, Region 10, Ground Water and Drinking Water Branch, WD-132, 1200 Sixth Avenue, Seattle, Washington 98101; telephone (206) 553-1890.

Dated: May 26, 1993.

Jane S. Moore,

Acting Regional Administrator.

Biotechnology Science Advisory Committee; Subcommittee on Plant Pesticides; Open Meeting

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of open meeting.

SUMMARY: There will be a 1-day meeting of the Biotechnology Science Advisory Committee's (BSAC) Subcommittee on plant pesticides, including transgenic plant pesticides. The meeting will be open to the public.

DATES: The meeting will be held on Tuesday, July 13, 1993, starting at 9 a.m. and ending at 5 p.m.

ADDRESSES: The meeting will be held at the: Crystal Gateway Marriott, 1700 Jefferson Davis Highway, Arlington, VA.

FOR FURTHER INFORMATION CONTACT: Creavery Lloyd, Committee Management Specialist, Biotechnology Science Advisory Committee (TS-788), Office of Prevention, Pesticides and Toxic Substances, Rm. E627, 401 M St., SW., Washington, DC 20460, Telephone: (202) 260-6900.

SUPPLEMENTARY INFORMATION: This notice is in accordance with the Federal Advisory Committee Act which requires that timely notice of each meeting of a Federal Advisory Committee be published in the *Federal Register*. This notice announces such a meeting. Attendance by the public will be limited to available space.

The Subcommittee will review a set of scientific issues being considered by the Agency in determining whether a pesticidal substance produced in a plant is exempt from the requirement of a food tolerance if it is an inherent plant pesticide derived from a known food source and meets certain other criteria. The Subcommittee will also be asked to comment on the feasibility of using *in vitro* digestibility studies as toxicity assays. Copies of the issues to be addressed at the meeting can be obtained by contacting Creavery Lloyd at the phone number listed above.

Dated: June 17, 1993.

Victor J. Kimm,

Acting Assistant Administrator for Prevention, Pesticides and Toxic Substances.

[FRL-4670-3]

Notice of Proposed Administrative Settlement

AGENCY: U.S. Environmental Protection Agency (U.S. EPA).

ACTION: Revised notice of proposed administrative settlement; request for public comment.

SUMMARY: In accordance with the requirements of section 122(i)(1) of the Comprehensive Environmental Response, Compensation, and Liability Act, as amended (CERCLA), notice is hereby given of a proposed administrative cost recovery settlement concerning the Sunbelt Site in Dallas, Texas, and Houston, Texas. The proposed settlement was entered into under the authority granted the U.S. EPA in section 122(h) of CERCLA and requires thirty-three (33) Respondents to pay \$81,408.50 in past costs to the Hazardous Substances Superfund. The money will be used to reimburse the U.S. EPA for costs incurred in connection with the U.S. EPA's removal actions at the Sunbelt site.

Notice of this settlement was published previously in the *Federal Register* on May 5, 1993 (58 FR 26783); however, the May 5, 1993 notice incorrectly listed only thirty-one (31) of the Respondents to the administrative settlement. The two additional Respondents are Hampstead Associates, Inc. and Oak Creek Partners, Ltd.

DATES: Comments on this proposed settlement must be received on or before July 23, 1993.

ADDRESSES: A copy of the proposed settlement is available at the following address for review: U.S. Environmental Protection Agency, Region 6, 1445 Ross Avenue, Dallas, Texas, 75202.

Comments on the proposed settlement should be addressed to: Mr. Geert Aerts, Cost Recovery Section (6C-EC), U.S. Environmental Protection Agency, Region 6, 1445 Ross Avenue, Dallas, Texas, 75202.

FOR FURTHER INFORMATION CONTACT: Geert Aerts at (214) 655-6733.

Dated: June 15, 1993.

W.B. Hathaway,
Acting Regional Administrator, U.S.
Environmental Protection Agency, Region 6.

BILLING CODE 6560-50-P

FEDERAL COMMUNICATIONS COMMISSION

[RAO Letter 22 DA 93-661]

Responsible Accounting Officers: Uniform Accounting for Postemployment Benefits in Part 32

The purpose of this letter is to provide guidance with respect to adopting Statement of Financial Accounting Standards No. 112 (SFAS-112), "Employers' Accounting for Postemployment Benefits" in Part 32, Uniform System of Accounts for Telecommunications Companies.

SFAS-112 was issued by the Financial Accounting Standards Board (FASB) in November 1992, and covers accounting for benefits listed in paragraphs 4 and 5 of the Statement. It requires the accrual method of accounting for these benefits instead of the pay as you go method and is mandatory for fiscal years beginning after December 15, 1993, although the FASB encourages earlier implementation. Therefore, to be in compliance with generally accepted accounting principles (GAAP), companies must account for postemployment benefits on the accrual basis on or before January 1, 1994.

The Ameritech Operating Companies (Ameritech) and US West Communications, Inc. (US West) on December 22, 1992, and February 22, 1993, respectively, filed notices of intent to adopt SFAS-112. These notices were filed pursuant to Section 32.16 of the Commission's rules, which requires carriers to apply new standards adopted by the FASB and provides for automatic Commission approval unless the Commission notifies carriers otherwise within 90 days after receiving a notice.¹

We allowed Ameritech to adopt SFAS-112 for regulatory purposes under the automatic approval provision of § 32.16. We did not object to Ameritech's notice because the carrier was adopting SFAS-112 pursuant to the requirements set forth in SFAS-112 and was doing so at the same time it was adopting SFAS-112 for financial reporting purposes. We denied the US West notice, however, in a letter dated

April 26, 1993, because the US West proposal requested permission to use a three year phase-in instead of the flash-cut approach that is required by SFAS-112.

To avoid any confusion that could occur as a result of the above actions, this letter provides directions for adoption of SFAS-112. Carriers that have not yet adopted SFAS-112 are required to do so under the provisions of § 32.16.

Timing of Adoption. Carriers will adopt SFAS-112 for regulatory accounting purposes using the same effective date they use for financial reporting purposes, but no later than January 1, 1994.

Notification. Each carrier shall file a notice of intent to adopt SFAS-112 90 days prior to adopting the standard, with October 1, 1993, being the last day to file notice in order to meet the January 1, 1994, mandatory adoption date. This notice shall provide us with the interstate revenue requirement impact for the current year and a projection for the next three years. An example of the format to be used in making this revenue requirement filing is attached.

Accounts to be Utilized. Carriers shall use the following accounts to record entries related to SFAS-112.

1. **Catch-up Entry.** To record the effects of the catch-up entry, carriers should charge Account 6728, Other general and administrative, and credit Account 4310, Other long term liabilities.

2. **Cash payments.** Cash payments made during the year for postemployment benefits will be charged to Account 6728, Other general and administrative, for all items not specifically required to be charged to the expense matrix, pursuant to § 32.5999(f). The payroll related postemployment cash payments currently subject to the Expense matrix requirements in § 32.5999(f) shall continue to be recorded through the matrix.

3. **Annual Liability Adjustment.** The postemployment liability recorded in Account 4310, Other long term liabilities, will be adjusted at least annually based on claims data with contra entries to Account 6728, Other general and administrative.

This letter is issued pursuant to authority delegated under Section 0.291 of the Commission's Rules, 47 CFR 0.291. Applications for review under Section 1.115 of the Commission's Rules, 47 CFR 1.115, must be filed within 30 days of the date of this letter. See 47 CFR 1.4(b)(2).

Sincerely,

Kenneth P. Moran,
Chief, Accounting and Audits Division,
Common Carrier Bureau.

[PR Docket No. 93-81; DA 93-634]

Private Land Mobile Radio Services; Alaska Public Safety Plan

AGENCY: Federal Communications Commission.

ACTION: Notice.

SUMMARY: The Chief, Private Radio Bureau and the Chief Engineer released this Order accepting the Public Safety Radio Plan for Alaska (Region 2). As a result of accepting the Plan for Region 2, licensing of the 821-824/866-869 MHz band in that region may begin immediately.

EFFECTIVE DATE: June 14, 1993.

FOR FURTHER INFORMATION CONTACT: Betty Woolford, Private Radio Bureau, Policy and Planning Branch, (202) 632-6497.

SUPPLEMENTARY INFORMATION: Order

Adopted: June 2, 1993.
Released: June 14, 1993.

By the Chief, Private Radio Bureau and the Chief Engineer:

1. On January 28, 1993, Region 2 (Alaska) submitted its Public Safety Plan to the Commission for review. The Plan sets forth the guidelines to be followed in allotting spectrum to meet current and future mobile communications requirements of the public safety and special emergency entities operating in Alaska.

2. The Alaska Plan was placed on Public Notice for comments due on

¹ 47 CFR 32.16.
